National Audubon Society Field Guides: National Audubon ... Great first section on distinguishing types of insects, but the field guide part is too broad and includes too many ranges to actually be useful in identifying insects (for example, insects only found in the pacific northwest and insects only found east of the rockies are included). It looks pretty, though, with lots of full color photographs. National Audubon Society First Field Guide: Insects by ... A more

hardy bird than the other brown-backed thrushes, the Hermit migrates north earlier in spring and lingers later in fall than the others; it is the only one likely to be seen in winter in North America. If startled from the ground in the forest interior it often perches low and stares at the observer, flicking its wings nervously and slowly raising and lowering its tail. In summer, its ... Hermit Thrush | Audubon Field Guide Spiders, bugs, moths, butterflies, beetles, bees, flies, dragonflies, grasshoppers and many other insects are detailed in more than 700 full-color photographs visually arranged by shape and color.
