The Inter-Integrated Circuit™  
(I2C™) module is a serial interface  
useful for communicating with other  
peripheral or microcontroller  
devices. These peripheral devices  
may be serial EEPROMs, display  
drivers, analog-to-digital

converters, etc. Section 24. Inter-Integrated Circuit (I2C) Self-Paced Training. The material in these training modules exists elsewhere on this site in a general reference format. However, the training modules present it in an organized, step-by-step sequence to help you learn the topic from the ground up.
