## Access Free Visual Studio Solution Project Difference

Visual Studio Solution Project Difference Solutions are containers used by Visual Studio to organize one or more related projects. When you open a solution in Visual Studio, it will automatically load all the projects it contains. When you create a new project in Visual Studio, it automatically creates a solution to house the project if there's not a solution already open. Visual Studio Project vs. Solution - Stack Overflow Solutions. A project is contained within a solution. Despite its name, a solution is not an "answer". It's simply a container for one or more related projects, along with build information, Visual Studio window settings, and any miscellaneous

### Difference

files that aren't associated with a particular project. Solutions and projects - Visual Studio | Microsoft Docs Open Visual Studio. On the top menu bar, choose File > New > Project.. The New Project dialog box opens.. In the left pane, expand Other Project Types, then choose Visual Studio Solutions. In the center pane, choose the Blank Solution template.
